## *Matchmaking*

15<sup>th</sup> October 2020

Time: 15.00 - 17.00

On-line event: Zoom®

The EIT RawMaterials is a platform for innovation funded by the European Institute of Innovation and Technology (EIT). The EIT has created the so-called KIC - Knowledge Innovation Communities, communities that aim to promote innovation and education in Europe in crucial sectors, supporting entrepreneurship and enhancing the passage of new ideas from the incubation phase to the market. The EIT RawMaterials, which since 2016 has established one of its nodes in Rome, is particularly committed to addressing the global challenge of supplying raw materials in Europe through programs and projects that aim to develop technology throughout the entire value chain of raw materials: from the exploration of resources, to the mining industry, from metallurgical processes to the replacement of critical or toxic raw materials, from the recycling of end-of-life product materials to the design of products for the circular economy. As part of regional development programs, the EIT RawMaterials has created a Hub in the Puglia Region coordinated by ENEA, in order to increase the involvement of local ecosystems in the activities of KIC and its partnership. The Regional Center South Italy will also aim at reaching new organizations and promote the participation of the most innovative industries and SMEs, as well as the involvement of the prestigious universities and research centres in the area.

The morning Infoday virtual meeting and the matching event in the afternoon represent a chance to know deeper the opportunities offered by the EIT Raw Materials to the southern Italian stakeholders (start-up, spin-off, SME, companies, research groups, university and school students).
