**EIT RawMaterials Roadshow**

Second stop: 21 June 2019, Lecce, Italy

## EIT RawMaterials Roadshow

21st June 2019

Lecce, Aula Fermi Edificio Aldo Romano, Campus Ekotecne, Via Lecce-Monteroni (IT)

The EIT RawMaterials is a platform for innovation funded by the European Institute of Innovation and Technology (EIT). The EIT has created the so-called KIC - Knowledge Innovation Communities, communities that aim to promote innovation and education in Europe in crucial sectors, supporting entrepreneurship and enhancing the passage of new ideas from the incubation phase to the market. The EIT RawMaterials, which since 2016 has established one of its nodes in Rome, is particularly committed to addressing the global challenge of supplying raw materials in Europe through programs and projects that aim to develop technology throughout the entire value chain of raw materials: from the exploration of resources, to the mining industry, from metallurgical processes to the replacement of critical or toxic raw materials, from the recycling of end-of-life product materials to the design of products for the circular economy. As part of its regional development programs, the EIT RawMaterials has created a Hub in the Puglia Region coordinated by ENEA, in order to increase the involvement of the local ecosystems in the activities of KIC and its partnership. The *MedinHub* will also aim to reach new organizations and promoting the participation of the most innovative industries and SMEs, as well as the involvement of the prestigious universities and research centres in the area.
